## Final Step: Disable the Microsoft GPS Management Utility

- Q: Why am I disabling the Microsoft GPS Manager?
- R: In Windows Mobile 5, Microsoft provides developers with the ability to easily capture some GPS information without having to develop their own GPS software. These GPS capabilities are very limited and do not meet the requirements of Prosurv Pocket Quads 2006. Prosurv Pocket Quads 2006 uses our own powerful Prosurv GPS dll. You should therefore disable the Microsoft GPS Manager so that the manager does not interfere or slow down the processing of the incoming GPS data.
